From: Peg Armstrong, Interim Assistant Superintendent, on behalf of the Calendar Committee  
Date: Tuesday, February 19, 2019  
RE: Possible 2018-19 Calendar Amendments for further School Closure Days

---

At this point in time, the District has had five school closure days due to unsafe road conditions. This means that our last day of school is currently Thursday, June 20. One more snow day will make Friday, June 21 our last day of school. In an effort to limit the possibility of extending the school year beyond Friday, June 21, we have created the following contingency plan.

If we have only one more school closure day, then we will not need to make adjustments to the 2018-19 calendar. If we do have more than one more snow day, we want to diminish the impact on instructional time. To that end, the School Board approved a recommendation from the Calendar Committee to plan for the following possible changes to the 2018-19 school calendar:

<b>If we have:</b>	<b>We will adjust the 2018-19 calendar as follows:</b>
One more school closure day	No change to calendar (other than last day of school)
Two more closure days	<b>May 28</b> PD day becomes a full student day
Three more closure days	Add: Five late start days become full student days - dates will be communicated should this become necessary.

In the event that we do need to make more changes to the 2018-19 calendar, we will communicate that to you. Thanks for your flexibility and understanding.
